U.S. Goods Exports Supported 6.7 Million Jobs

Top 10 Destinations, Jobs Supported by Goods Exports in 2015

U.S. Service Exports Supported 4.8 Million Jobs

Top 10 Destinations, Jobs Supported by Service Exports in 2015

Frequently Asked Questions

Q: Where can I access data for all jobs supported by U.S. exports, by destination?

A: The data file and corresponding report are available on our website at: <http://www.trade.gov/mas/ian/employment>.

Q: Why are there only 71 countries with Jobs Supported by Total Exports figures?

A: Services trade data is only available for 71 countries, and this statistic is needed to calculate the number of jobs supported by total exports.

Q: Can I add jobs supported by total exports figures from several countries together to create a custom jobs-supported figure for a specified region?

A: Yes, for countries with available services data. However, note that because of limited services data, if the custom region contains destinations without services export detail, the number of jobs supported by exports is likely to be underestimated.

Q: Can I add jobs supported by goods exports figures from several countries together to create a custom jobs-supported figure for a specified region?

A: Yes, the figures are additive. For example, to see how many goods exports destined for NAFTA countries supported U.S. jobs, add 1.24 million to 968 thousand to arrive at a total of 2.21 million jobs that were supported by 2015 U.S. goods exports to NAFTA countries.
